Wasa AG and Eckart Holz GmbH
announce their cooperation

REPRINT
CPI 1/2023

Always an ace.

It takes considerable ambition to make it to the top. It is this desire that makes a champion.

But making it to the top (and staying there) takes a carefully devised product – such as our WASA UNIPLAST® ULTRA. For the past 33 years, it has been providing our customers with the assurance of always having the best product – much like an ace up their sleeve.

Focusing on the relevant core competencies

Wasa AG and Eckart Holz GmbH announce their cooperation

Just in time for bauma 2022, the companies Eckart Holz GmbH from Hünfeld in northern Hesse and Wasa AG based in Darmstadt announced their cooperation in the field of softwood production boards. Both companies are now focusing on their specific core competencies, which for Eckart Holz GmbH is the production of high-quality pine and larch production boards, while Wasa AG focuses on the solid plastic board Wasa Uniplast® Ultra and the polyurethane-coated softwood board Wasa Woodplast®.

As early as 1930, Adolf Eckart opened a sawmill in Hünfeld, which began manufacturing production boards for concrete block production in the mid-1980s. Today's managing part-

ner Manfred Eckart joined the company in 1988 and still manages it today together with the sales director and authorised signatory Daniel Kühn.

"It is a great asset for us to have found a well-known manufacturer based in Germany as a cooperation partner in Eckart Holz GmbH. As a full-range supplier, we will continue to offer our global customers every type of production board, from softwood boards to the coated compound board Wasa Woodplast® to the glass-fibre reinforced Wasa Uniplast® Ultra," says Matthias Bechtold, Chairman & CEO of Wasa AG. ■

NON PLUS ULTRA

More than 6 million of our WASA UNIPLAST® ULTRA boards are deployed in concrete plants all over the world. Many of them have been in use for decades – and are showing no signs of fatigue.

When we developed them at the beginning of the 1990s, we were far ahead of our time. And today, more than 30 years later, we are still ahead of the curve – because, while decades have passed, our determination to make what is strong even stronger, to make what is efficient even more efficient, and therefore to make good products and services even better has remained the same.

At WASA, this virtue has become a tradition – so that the best always remains the best.
